UV Tested for Color Fade Resistance

UV tests ensure your siding provides outstanding resistance to fading and discoloring. This advanced color retention is achieved by combining Luran® S ASA, made by BASF, with our innovative Royalside™ Compound and Dura Technology™ Process.

Cold Tested for Harsh Weather

Royal tests its siding against brittleness at temperatures as low as (14°F (-10°C)), ensuring your siding will maintain its superior durability, rigidity and structural integrity under severe weather conditions.

Impact Tested for Strength

Extensive impact tests are conducted at 73°F (23°C) and 32°F (0°C) to ensure your siding exceeds ASTM standards and can withstand the elements, including hail, under any condition.

Double Lifetime Warranty Fully Transferable

Royal is so confident in the superior quality of this product that it is backed by the most powerful non-prorated warranty in the business. Guaranteed.
